**INDUSTRIAL QUALITY CARBIDE TIPPED SAW BLADES MADE HERE IN OUR WINNIPEG PLANT FOR OVER 40 YEARS**

**CARBIDE TIPS:**

We use only the Industry leading Ceratizit Swiss carbide tips: with extra thick Micron C4 plus known for consistency and performance. We utilize a pretinned process between the carbide tip and plate for extra shock absorption.

**GRINDING:**

Gemini Saw Blades are ground on Vollmer CNC German machines. Equipment that is state-of-the-art Delivers the precision demanded by our customers. Along with 800G Diamond wheels to achieve our Mirror Finish.

**SAW PLATE:**

We utilize the best steel grade fully hardened heat treated bodies. The plates are ground on both sides to achieve true flatness. Laser cutting and tempering, holding tolerances to virtually to .001". Laser cut expansion slots for reduced vibration and copper plugs for low noise reduction and heat absorption.

**GEMINI and PGI Sharpening Service SUSTAINABLE cutting performances = EXTENDED LIFE**
